According to the internet, there are MILLIONS of wild species of mushrooms growing. It's extremely hard to identify each individual cluster of mushrooms. They are a fascinating and important part of the microbiome in the ecosystem we live in.

**Wild Oyster Mushrooms at Front**

**Young Gecko Lizard**

**Honey Bee**

**Yellow Cap Mushrooms**

# 2022 – Wildlife Observed 5 of 6

Grazing Deer Near Pond

Deer at Crossing

Buck at Back Corn Feeder

Deer at back "Cactus Trail"

Prior to 2022, the land on the west side had been densely wooded. This property was sold and is now populated by a number of Longhorn Cattle. The cattle and deer co-exist well together but may not be an ideal place for fawns to be hidden in the future.

Mother Deer and Fawns by House

Young Buck on Trail at Night

Fawn Near House

Deer Grazing

**2022 – Wildlife Observed 6 of 6**

**Deer at Back**

**Deer and Fawn at Pond**

**Deer at Pond**

**Young Buck on Trail**

**Mother & Fawn at Back**

**Near the Pond**

**Majestic Doe near Pond**

**Buck Near House**

**Deer at Back of Property**
